About Us

HAROON BROTHERS ENTERPRISES Refrigeration has been designing and manufacturing Chillers, Cold Stores, Refrigerated Transport Containers, and Water Cooler for the needs of the Industry Staff, Dairy Industry, Meat Processing, Ice Cream, Fruits and Vegetable export, Sea Food Export, and Agro-based value addition processes for the last 15 years. We con stantly work with our business partners to provide refrigeration solutions according to their needs. We have developed strong links in the food processing sector, which helps us under stand the constantly changing dynamics of this market sector. Haroon Brothers Enterprises has played a vital role in providing cold chain solutions, developing our employees as valu able assets, and providing them with state-of-the-art training, which in turn has helped soci ety in the food processing sector's growth, resulting in increased exports of Agro based commodities in Pakistan. With our Experience, we can provide a solution tailored to your needs. We have a strong engineering background and a skilled team of professional engi neers overseeing design, Manufacturing, Quality Control, and after-sales services

Our Mission & Vision

Mission

We believe in building the future by being fair and integrating innovative ideas and impecca ble skills to provide top-notch results and projects to our clients.

to provide quality workmanship, and customer service and maintain the highest level of pro fessional-ism, honesty, and fairness in our relationships with our customers, employees, and vendors.

Vision

To ensure the longevity of our company through repeat and referral business achieved by customer satisfaction in all areas including timeliness, attention to detail, and service-mind ed attitudes.

To maintain the highest levels of professionalism, integrity, honesty, and fairness in our rela tionships with our suppliers, subcontractors, professional associates, and customers.

Bulk Milk Chiller

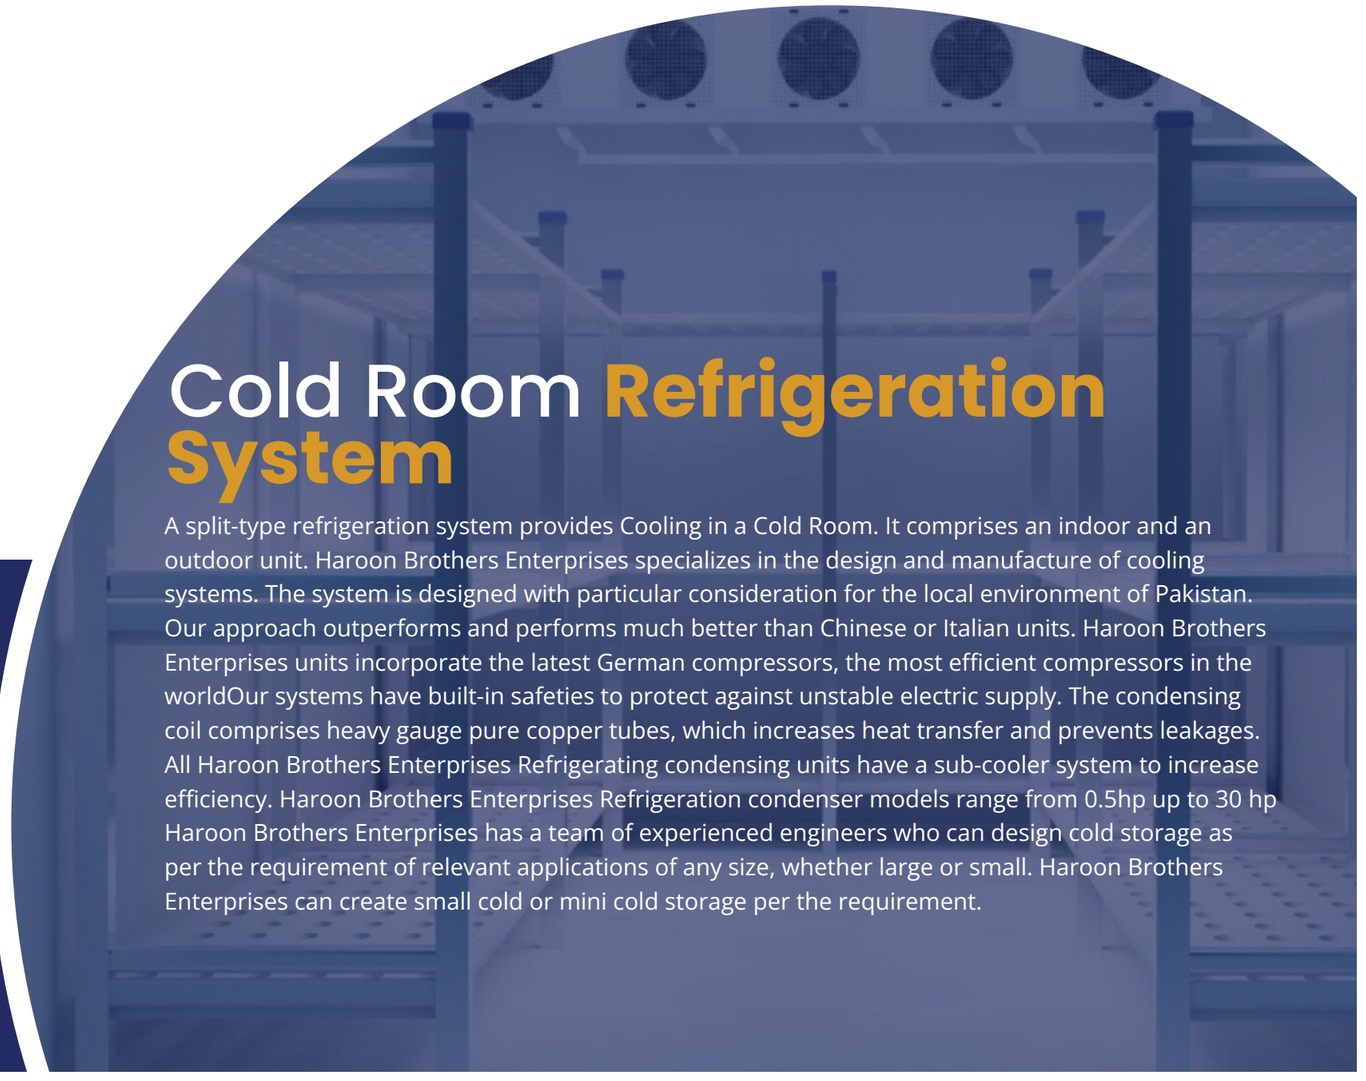

Bulk Milk Chiller every size per customer, needs Direct expansion, Bulk Milk Cooling Tank Capacity of 100 to 2000 Liters, has large opening lids for easy access and rounded internal corners. Tank insulation is provided by factory-injected polyurethane foam of 65 mm to facilitate thorough cleaning. We design our condensing units for R22 or R404 refrigerant systems. We use material SS-304, Shape & Orientation: Vertical / Semi-cylindrical open type, Round Shape, and Square Type of insulation: Tank insulation is provided by factory-injected polyurethane foam of 50 mm. The Refrigerant Temperature is 35'C to 4'C within 3 Hours for 1st milking & 10'c to 4'c within 1.5 hours for the 2nd milking

Water Coolers

The consumption of chilled water in places like schools, colleges, offices, and other commercial buildings is always high and frequent. Hence a full water cooler, which cools water super fast, is needed. The range of storage water coolers has a rugged and powerful Compressor and an all-stainless steel body for more durability. With power-saving insulation and a comprehensive warranty, these coolers are the best in terms of value for money. The use of eco-friendly refrigerants also makes them safe for the environment

HVAC (HEATING, VENTILATION, AIR CONDITIONING

Our Experience in the field of HVAC technology and embedded applications of innovative methods in the respective field has given us the strength to explore various competitive aspects of air conditioning and refrigeration systems Designing of HVAC system- Also called Heating Ventilating, Air conditioning designing is suitable for big projects like industries, commercial complexes, multi-storied buildings, etc., where the perspective of building strength is very muchanticipated concerning factors like Temperature,weather, and air circulation. We offer reliable ventilation and refrigeration services for large building project With several years of Experience in refrigeration and air conditioning systems, the services and functionalities extended in various phases of cooling systems

Cold Room Refrigeration System

A split-type refrigeration system provides Cooling in a Cold Room. It comprises an indoor and an outdoor unit. Haroon Brothers Enterprises specializes in the design and manufacture of cooling systems. The system is designed with particular consideration for the local environment of Pakistan. Our approach outperforms and performs much better than Chinese or Italian units. Haroon Brothers Enterprises units incorporate the latest German compressors, the most efficient compressors in the worldOur systems have built-in safeties to protect against unstable electric supply. The condensing coil comprises heavy gauge pure copper tubes, which increases heat transfer and prevents leakages. All Haroon Brothers Enterprises Refrigerating condensing units have a sub-cooler system to increase efficiency. Haroon Brothers Enterprises Refrigeration condenser models range from 0.5hp up to 30 hp Haroon Brothers Enterprises has a team of experienced engineers who can design cold storage as per the requirement of relevant applications of any size, whether large or small. Haroon Brothers Enterprises can create small cold or mini cold storage per the requirement.

Cold Storage

With complete in-house manufacturing, installation, and design team, we can deliver a project of any size and capacity in the fastest time with the highest of standards, thanks to our agile manufacturing techniques and integrated operational systems.During design and manufacture, special consider-ation is given to the system's efficiency and the equipment's total lifecycle.

The result is an optimized solution appreciated by our Clients. Insulation for Cold Store (PUR Sand-wich Panels and PIR Panels)The efficiency of the Cold Storage depends on the insulation of the Cold Store. Haroon Broters Enterprises has gained vast knowledge of prefabricated sandwich panel systems. We use industry-leading panels that are excellent for usage up to -40'Celcius and have the highest market performance.PUR/PIR insulation panels are a composite prefabricated building mate-rial. It is made up of a rigid core sandwiched between two metal sheets. The wooden body is made of polyurethane, known for its excellent heat insulation properties. Polyurethane is the most widely used insulation material for cold rooms and energy-efficient buildings. Typical construction comprises sandwich panel walls, roofs, and floors.PUR sandwich panel is optimum for hygienic conditions. PU sandwich panel rooms are ideal for storing Meat, Fruits, Vegetables, Medicines, and Vaccines in the Cold Stores. The panel's smooth surface finish prevents any bacterial growth and can be easily cleaned. The panels are completely waterproof and airtight, which prevents any air leakages.

01. One-Stop Services

With a complete project team for planning, design, equipment, technology

02. Quality Guarantee

Haroon Brother Enterprises has complete industry qualifications and can guarantee 100%

03. Excellent Teamwork

We have a technical team of about 20 people. Cold storage room design, unit

04. Integrated Resources

We cooperate well with Compressor imported brands General, Scroll Compressor, and Tecumseh

- High energy efficiency
  Max performance for
  constant and reliable results
- High-quality components
  Long durability
- Accurate Temperature
  Precision and repeatability
- Operating cost reduction
  Budget achievement
- Tailored solution
  With in-built flexibility
- Rapid and powerful cooling
  Time-saving
- Quiet operations
  Worker's convenience
- Excellent price / performance
  ratio A solution for any budget
- Compact design saves
  precious space

Factory Strength

All the refrigeration units and insulated panels are assem bled and manufactured in our factory. We can o er a com petitive price over other suppliers in the market. The factory covers an area of 7200-sqm factory building employing 20 workers. Locations in the factory are designated. The tasks of employees are well-de ned. These enable e cient work.

After Sales Services

One-year free repair and maintenance, 7*12-hour technical support, and effcient and fast cold storage repair and main tenance services let you stay worry-free. We also have a brilliant sales team ready to provide comprehensive one-stop
service for customers

Modern Production

Imported equipment, integrated production lines, and standard production processes ensure product quality. Long-time stocking of fixed amounts of standard accessories
improves shipment speed and allows a fast delivery cycle.

Research Team

We have established technology research and development cooperation with many domestic and foreign scientific research institutions and have applied for more than 70 national patents. We have a world-class research and development laboratory to conduct performance testing of our units and ensure control over various research, development, and equipment indicators.

Health & Safety policy

Haroon Brothers Enterprises is committed to the health, safety, and well-being of its employ ees, customers, and contractors by adopting an atmosphere that focuses on preventing incidents and preserving the environment. We will operate in compliance with all relevant environmental legislation and constantly attempt to conduct all activities in an efficient and eco-friendly manner, meeting guidelines and codes of conduct

Our Commitment Is To:

Ensure that all employees are adequately informed of identified risks and, where appropriate, receive relevant information, instruction, training, and supervision.

Revitalize our HSE commitment by promoting effective employee representation, consultation, and involvement to align our safety values with our business goals.

Ensure continual reduction in risks related to health, safety, and the environment by establishing, monitoring, and achieving improvement objectives.

Ensure compliance with this policy for all employees, contractors, and visitors.
This Health, Safety, and Environmental statement of intent will be reviewed and, if necessary, revised annually.

Quality Statement

Haroon Brothers Enterprises defines Quality in terms of successful performance of characteristics such as excellence in design, material suitability, manufacturing compliance, workplace efficiency, safety and cleanliness, timely delivery, and business process effectiveness
entrusted to us by our clients.

Haroon Brothers Enterprises complies with its Quality System by continually improving technical capabilities, shop floor work processes, material selection, and use through practical and focused training.

Haroon Brothers Enterprises encourages feedback and suggestions from employees, customers, and suppliers that could enhance Quality, increase productivity, and provide an environmental or workplace benefit and takes positive action accordingly

Quality Assurance and Quality Control

Our team of professionals from QA/QC is committed to assisting clients in executing projects as per the quality plans and specifications without any compromise on Quality from material procurement to dispatch stage, including final Project Quality document submis sion.

Why Choose Us?

We can deliver undertaken assignments within a specific period, keeping the client's satis faction intact. Our highly motivated team of professionals encodes minute details from idea to concept development with precision hence mitigating the risk of failure. Our projects incorporate unique artistic images and functional solutions, making us the best construc tion company in Pakistan.

Client satisfaction is our utmost goal and we do it with the help of our technical profession als who have the aptitude to undertake the most challenging and impressive civil engineer ing and building construction in Pakistan.

Our experienced team of professionals devotes their heart, time, and energy to more than just the job at hand. With us, you'll find a partnership to last for a lifetime.

What We Do

We attribute the strength of our company to our professional ethic of providing a quality standard of construction projects within the program to the client's needs and requirements. Our staff is our greatest resource and our youthful dynamic management team provides a 'hands-on approach to all projects.

We consistently build on our legacy of quality work. Project after project, we build on our rep utation of delivering projects with integrity, fairness, and excellence.

We maintain a culture that places high value on critical thinking, open communication, and a willing-ness to invest early in good planning. Our process is to continually look ahead to see the big picture and evaluate the path of our progress.
